## Pressure reducing valve(Level access)

### Application

- ◆The pressure reducing valve is a very easy operation of the pressure control valve which provides precise control and easy installation and maintenance.
- ◆The valve can control the valve after pressure without the need for a pneumatic or electric control element. Pressure relief valve is a two-seat diaphragm controlled springloaded proportional control valve which is mainly used in food, beverage, brewery, pharmaceutical, chemical and other industries.

### Technical Specifications

SIZE : 1 "-3", DN25-DN80

Nominal pressure : PN2.5-10

Inlet pressure : 8bar

Outlet pressure : 0.3-5bar

Kv Value : 4-70m<sup>3</sup>/h

Max. temperature:180°C

media: steam, liquid, gas

Connection mode : Clamps, welding, thread, Flange

Certificate : 3-A-64-00 , PED/97/23/EC, FDA177.5500

## Miniature Constant Pressure Regulating Valve

### Application

- ◆ Miniature Constant Pressure Regulating Valve is a sanitary constant pressure valve to be applied to the food processing, beverage, pharmaceutical and other areas of the pipeline system.
- ◆ Constant pressure design has two kinds to maintain a constant pressure function selection :
  - 1) V type (inlet constant pressure); maintain constant pressure at the valve inlet. Such design is specially applied at the back of heat-exchanger. It is used as safety valve.
  - 2) A type (Outlet constant pressure): maintain constant pressure at the outlet. Such design is used as the front of filling machine and bottle filling machine.

### Technical specifications

- ◆ Size : 3/4"-1.25",DN20-DN32
- ◆ KV Value : 10-21m<sup>3</sup>/h
- ◆ Contact part of the material: 1.4404/316L, other parts: 304
- ◆ Seal : EPDM+PTFE(FDA177.2600)
- ◆ Connection mode : Clamps, Welding, Thread,ISO、DIN、SMS、RJT
- ◆ Surface: sand blast outside, mirror finished inside ( $R_a \leq 0.6\mu m$ )
- ◆ Working Temperature: -10 to 150 °C
- ◆ Working pressure : 8 bar
- ◆ The max working pressure: 12 bar Supercheuger(option)
- ◆ Certificate : 3-A-64-00 , PED/97/23/EC,FDA177.5500

## Constant pressure valve/Back pressure valve

### Application

- ◆ Constant pressure valve is a sanitary constant pressure valve to be applied to the food processing, beverage, pharmaceutical, and other areas of the pipeline system.
- ◆ Constant pressure design has two kinds to maintain a constant pressure function selection :
  - 1) V type (Inlet constant pressure); maintain constant pressure at the valve inlet. Such design is specially applied at the back of heat-exchanger. It is used as safety valve.
  - 2) A type (Outlet constant pressure): maintain constant pressure at the outlet. Such design is used as the front of filling machine and bottle filling machine.
- ◆ Size : 1.5"-3",DN40-DN65
- ◆ KV Value : KV36m<sup>3</sup>/h to KV62m<sup>3</sup>/h
- ◆ Contact part of the material: 1.4404/316L, other parts: 304
- ◆ Seal : EPDM+PTFE(FDA177.2600)
- ◆ Connection mode : Clamps, Welding, Thread,ISO、DIN、SMS、RJT
- ◆ Surface: sand blast outside, mirror finished inside ( $R_a \leq 0.6\mu m$ )
- ◆ Working temperature: -10 to 150 °C
- ◆ Working pressure : 8 bar
- ◆ The max working pressure: 12 bar ,Supercheuger(option)
- ◆ Certificate : 3-A-64-00 , PED/97/23/EC,FDA177.5500

## Safety Valve-Basic Type

### Application

- ◎ The safety valve is used to protect the flow pressure safety through pipes, pumps, accessories, pools, etc.
- ◎ With sanitary and safe design, it's avoid operation danger and equipment failure caused by exceed pressure.
- ◎ With sanitary design and completely material of stainless steel, the valves is the best choice for protection of equipments in diary, food, beverage, pharmaceutical and fine chemical industries.

### Operating Principles

Manual fast row safety valve features: you can open the valve manually, the spot cleaning (used together with the pump channel) can allow the fluid to pass through

- ◎ Under normal operating conditions, the valve remains closed.
- ◎ The specific pressure is set by adjusting the spring pressure nut.
- ◎ When the pressure in the pipes is exceed the specific pressure, the valve will open automatically to make the liquid pass over, so that pressure in the pipeline is reduced.
- ◎ The valve can be operated with handle . When the handle remains open on the operation spot, the detergent can flow though the flow valves.

### Technical Specifications

- ◆ Size : 1"-4",DN25-DN100
- ◆ KV Value : 8.5-180m<sup>3</sup>/h
- ◆ Max. temperature : 130°C(EPDM)/266°F
- ◆ Set pressure : (0-3bar/0-6bar/6-10bar )
- ◆ Material : 304/316L
- ◆ Certification: safety valve manufacturing license for special
