

Centrifugal Pump SLX

Application

DJ-SLX series is an all-stainless steel centrifugal pump that contains stainless steel motor. Not only optimizes the internal structure, impeller design, dead angle treatment, machine seal pressure balance design and the machine seal is completely in the flushing area, but also optimized the external hygiene of the pump to make it absolutely hygienic and reduce the dead angle inside. Because there is no dead zone, it is very easy to be cleaned by CIP, SIP sterilization, etc. In addition, we have the largest flexibility combination for the DJ-SLX series of pumps. For example, the pump outlet angle can be adjusted from 0° to 360°. The pump cover is clamp connection, so that the pump can be maintained easily. The replacement of the seals maintains high efficiency and reduces the high professionalism of the personnel, it do not require special tools. DJ-SLX series centrifugal pump has become a high-performance pump due to its high efficiency, hygienic, high reliability and low cost.
